Abstract— **With ever increasing population there is a great need of providing quality education to all the children. Here we have developed the application that provides the user to access the quality education and check their progress.**

I. INTRODUCTION

Education App offers parents a mobile app, which provides them all the information at their fingertips. At the school's end – Education App offers a simple intuitive web interface to manage the communication so school is always in control of what parent's receive on the app. Challenge in School Parent communication Today, parents expect to be involved and informed real-time by schools. Schools too want to communicate effectively and timely with parents for whom they use multiple medium – emails, text messages, print media (newsletters) and school diary. This approach is time consuming and chaotic for both, the school and the parents There is definitely need of a better solution that brings entire communications under one umbrella.

II. OBJECTIVE

The main objective of our project is to provide a platform for users to do following:

- Access the database of students and faculties
- Ease in communicating the student
- Managing their exam results

III. FEATURES

Features of our project are as follows:

School Login Admin

- GCM Push Notification
- Manage Student Details
- Manage Student Attendance
- Manage Exams and Results
- Manage Student Reports
- Growth chart of student
- Events and news
- Holidays
- Top students information
- Teacher information
- Communicate Student/Parent with School by message

FUNCTIONS OF APP:

Profile
Student Complete profile , Bi
Contact information

Attendence
Student attendance report m

Exams
Schedule time table of pre d

Results
Result of all taken examinati
With detailed report and info

Teachers
Information and contact of a
subjects of student

Growth
Graph of Growth for student

Holidays
Report and list of holidays an
school is closed

News & Events
Common news and events fo

Notice
Perticular notice for student
or his behaviors

Top Students
List of top students. Top stud

Discussion
Enquiry or discussion with sc
send message to school

-

IV. CONCLUSION

In this project we are providing the facilities for users to :

- Track and view the reults of exam
- check the progress of students
- have discussions with teachers or with other students
